

# Crystal IT—Capability Statement

## SOLUTIONS

Crystal IT's **Avert™ Access Control** verifies the identity of the computer user in real time, eliminates password requirements, and *automatically locks down the system* when the authorized user exits the vicinity of the terminal.

The major benefits of **Avert™ Access Control** include:

- Two Factor Authentication—Active RFID and Biometrics
- Meets and Exceeds Compliance Regulations (HIPAA, GLBA, etc.)
- Automatically Generates Passwords (Windows and Applications) for the User
- Prevents Unauthorized Access to Computer
- Controls Access and Security to Network
- Eliminates all Password-Related Calls to the IT Help Desk
- Protects Corporate, Employee, Customer, and Patient Data

## SERVICES

Crystal IT offers on-site configuration, training, updates and technical support. In addition to being a leading computer security solutions provider, Crystal IT is recognized as an expert in education and information regarding IT Security. Crystal IT currently offers informational seminars nationally and is available in an advisory capacity.

## EXPERTISE

Established in 2007, Crystal IT has developed an effective access control module that has yielded a next generation solution for governing network access and managing multiple passwords for only those users presenting proper authorization and valid credentials. Our ability to secure data without inherent compromise provides our clients with differentiation that cannot be achieved by other vendors. Compromise is further avoided by eliminating access cards which store data and are easily stolen or lost by users.

### Company Principals

- Fred Kloecker—Co-Founder & CEO, holds a degree from the University of Kansas and has a background encompassing operations, project management and market improvements for Fortune 1000 organizations.
